

2021

Annual Report

A Message from our Director

Greetings from the Paulding County Office of Economic Development

2021 has been a year of recovery, stability and certainly some great business growth in Paulding County. The "shop local" mentality took on special meaning this year as we promoted and supported local businesses and events around the county like never before.

Your 501C3 PCED office worked diligently at helping communicate available commercial buildings, properties, and open employment opportunities while developing a plan to promote these opportunities to graduating students at the local high schools, Vantage Career Center and local colleges. Our focus now is to get into younger county school classes to help them understand the Paulding County economy and life sustaining employment options available for their future around the county.

We look forward to working with your business in 2022. We would be interested in hearing your expansion thoughts, entrepreneurial or futuristic "outside the box" ideas that will continue to help us grow and keep the Paulding County economy on the leading edge. Please keep us in mind as you work to help us remain **#pauldingcountystrong**

-Tim Copsey, Director
